

Dear Sir/Madam,

By this letter I would like to apply for German student visa to start my education at Leibniz university in Hannover and later at Georg-August-Universität Göttingen.

I started studying English language at McDaniel College in Budapest from October 2018, although it was a great experience for me and I had a great chance to improved my English language, but I believe I will have a better future in Germany, because Germany has one of the highest educational system quality.

one of the reason that I would like to study in Germany is that I already studied German till B1 level and I am so interested to improve my German language skills and study architecture in German.

In addition I would like to know more about German rich cultute and getting to know german people by studing and maybe later working in germany also I am happy being able to get insights into the German family of my brother in law, Hannes Andresen, who is married to my older sister Mahsa.

I choosed to apply for Georg-August-Universität göttingen because it is international, an old university with great history and it is offering architecture with high level of education.

The reason that I chose to study architecture in Germany is that I am interested in designing, construction, learning more about classical and modern architecture in general and especially about German architecture.

The other reason is, Germany is one of the best industrial countries in world and this will help in future to design and construct the optimised and energy-efficient houses with using the green energy.

I would be very happy if you would give me the study Visa and by that, the chance to continue my studies.

Thank you so much for your support
