My CTIF Vision

My vision for CTIF encompasses a wide variety of goals which cannot be mentioned in this scope. Just to name a few, my primary CTIF vision at nation-wide level is to get benefit from this valid and reliable international association with regard to exchanging of knowledge and experiences with other fellow firefighters and rescuers from around the world in order for us to be able to serve our communities in a better and much safer way for our firefighters as well as make our communities a safer place for the inhabitants. My CTIF vision at world-wide level includes all aims and objectives stated in the CTIF Statutes plus developing CTIF missions in Asian countries particularly in the Middle East as there are a few Asian countries which are the members of CTIF when compared with European countries.

Current and Previous Contribution to CTIF

Tehran Fire Department of which I am the CEO and Fire Chief became a CTIF National Committee and an ordinary member of CTIF in 2016. Following this membership and in order to present our organization as well as our country more appropriately and actively we presented at Delegates Assembly 2016 in Helsinki, Finland and at Delegates Assembly 2017 in Villach, Austria. We are also planning to deliver another presentation at DA 2019 in Martigny, Switzerland.

In addition, in the beginning of 2017 Tehran Fire Department held its 2nd National Urban Fire Service and Safety conference in Tehran in which we officially invited speakers from CTIF and with the arrangement of the President of CTIF we benefited from the presence and the valuable input from The CTIF Hazardous Materials Commission Chairman and the Extrication & New Technology Chairman in the conference.

Moreover, There are three articles written by Tehran Fire Department personnel that have been accepted by CTIF managers and have been put up at www.ctif.org.

My Experience

Current Experience

I have been working in Tehran Fire Department for more than 30 years and I am currently holding the position of Chief Executive Officer (Fire Chief) of Tehran Fire Department over the past two years.

Previous Experience

I actually climbed the career ladder in the organization in that I started my career thirty some years ago from being a professional firefighter in different fire stations. Then, after a couple of years of getting experience I moved up to the positions of Crew Commander, Watch Commander, Station manager, District Fire Chief Assistant, and District Fire Chief. Prior to taking the position of CEO I was also the Deputy Chief for Operations Division of Tehran Fire Department for 4 years.

Higher Education

I have a Bachelor of Arts in "Command and Control in Fire Ground" from Tehran Fire Department Applied Sciences Faculty.

Fire Related Skills

In addition to the most required managerial qualifications I have also been able to get many operational fire & rescue related skills throughout my career time.

Business Skills

In line with my commanding positions over the last 10 years in Tehran Fire Department I think I am also able to take bigger managerial positions when it comes to the Management of Urban Development.

Language Skills

Mother Language	2nd Language		3rd Language	
	Read - Yes	Speak - Yes	Read Y/N	Speak Y/N
Persian Language	English
